

**TTW Downloadable Game Assembly Instructions**

1. Print this sheet 2X on letter-sized photographic paper or heavy card stock using either ink jet or color laser printer.
2. Using spray glue or a very thin layer of glue stick or liquid glue, glue a sheet of construction paper or color card stock to the back of each sheet. Red on one sheet, Blue on the other. Use the edge of a ruler with a protect sheet to squeeze out bubbles and make good glue contact for high quality cards.
3. Using the black cut marks as a guide, and a straight-edge with a razor or Exacto knife, cut out all the cards in 2-inch squares.
4. Game play instructions on website. Remember, these are less precise than actual round cards, but they should give you an idea of the game play.
